## DETAILED ACTION

### *Response to Arguments*

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-4, 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over admitted prior art (Admission) in view of Powell (US Patent 4,007,953).

Regarding claim 1, Admission in the specification (pages 2-4 and figure 1) teaches transducer mount 100 including a base 130, a holder sleeve 140 or first sleeve extending from the base, and a union sleeve 150 or second sleeve engaged with the holder sleeve.

The prior art lacks the first sleeve slidingly engagable and removable from the second sleeve

Powell discloses a coupling assembly for electrical and fluid applications (column 1 lines 6-14) wherein there is taught a sleeve like barrel 12 and sleeve like coupling nut 14 assembled with a snap ring 16 so that the nut may be removed. The two sleeve like portions slide together along key ways.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide for a removable sleeve like coupling nut so that it may be replaced should it wear (column 1 lines 34-47).

Art Unit: 2856

As for claim 2, Admission shows the base includes a top surface, at least one side surface, and a bottom surface.

As for claim 3, Admission shows slots on the base top surface with slot holes extending through the base and screws fixedly engaging the slot holes for attaching the transducer mount to a housing.

As for claim 7, the union sleeve 150 includes threads 151 for attaching an extractor tool for removing a transducer and a transducer holder from the holder sleeve 130 inner diameter.

As for claim 4, Examiner takes Official Notice that it is widely known in the art to provide slits, slots and grooves in various devices and one of ordinary skill would have known of their advantageous use in allowing easy separation by prying with a screwdriver.

#### ***Allowable Subject Matter***

Claims 5, 8, 9 and 13-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 10-12 are allowed.

Please see earlier Office Action for reasons for allowance of claims 5, 8, 9-12. New claims 13-16 are allowable for reasons also cited in the earlier Office Action.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2856

The additional references cited on the accompanying form PTO-892 though not cited above are provided to indicate other prior art probe mounts which include one or more features or limitations in common with the instant invention.
